Reviewers / xxi
Acknowledgments / xxii
About the Authors / xxiii
How to Use This Text / xxiv
How to Use the Electronic Resources / xxx

UNIT 1

Foundations of Maternal, Neonatal, and Women's Health Nursing / 1

CHAPTER 1

NURSING IN THE CONTEMPORARY HEALTH CARE SYSTEM / 3

Current State of Health Care Delivery	4
Technologic Advancement for Diagnosis and Treatment	4
Focus on Health	4
Establishment of Health Goals	5
Risk Assessment and Management	5
Movement of Health Care to the Community	5
Information Diffusion	6
Cost Containment	6
Health Disparities	6
Cultural Competence	6
Managed Care	7
Development of Collaborative Teams	8
Changing Demographics	9
Nursing Skills for Professional Practice	9
Changes Reflected in Maternal, Neonatal, and Women's Health Care	10

Advances in Diagnosis and Treatment	10
Risk Assessment and Management	11
Cost Containment and Professional Guidelines	12
Trends in Maternal, Neonatal, and Women's Health Care	12
Decreased Hospital Stay	12
Fewer Interventions	12
Family-Centered Care	12
Community-Centered Care	13
Evidence-Based Practice	13
Understanding Women's Health	13
Biological Issues	13
Behavioral Issues	14
Environmental Issues	14
Social Issues	14
Cultural Issues	14
Complementary and Alternative Therapies	15
Issues Related to the Care of Women and Infants	15
Access to Care	15
Reduction of Medical Errors	15
Medical-Legal Issues	16
Philosophy of Care	17
Nursing Implications	18
Skills Required for Practice	18
Licensure and Credentialing	18
Collaborative Relationships	18

CHAPTER 2

THEORETICAL PERSPECTIVES ON THE CHILDBEARING FAMILY / 23

Family Theories	24
Family Systems Theories	24
Families are Systems of Function and Structure	24
Families, Systems, and Culture	27

The Childbearing Family 29
 Cultural Considerations in a Family's Response to Birth 30
 Theoretical Approaches Applied to the Childbearing Family 30
 Attachment and Maternal-Infant Bonding 32
Nursing Implications for the Childbearing Family 32
 Effect of Birth on the Family 32
 Variations in the Birth Process: Impact on the Family 37
Nursing Implications 39
Nursing Process 39
 Assessment 39
 Nursing Diagnoses 40
 Outcome Identification 40
 Planning 40
 Nursing Intervention 40
 Evaluation 40
Case Study and Care Plan 40

CHAPTER 3

COMPLEMENTARY AND ALTERNATIVE THERAPIES / 49

Contemporary Use of Complementary Therapies 50
Differentiating Alternative from Complementary Therapies 52
Background and Classification of Modalities 52
 Systems of Healing 52
 Nursing Implications 54
 Healing Approaches Congruent with Self-Healing 54
Complementary Modalities 55
 Physical Manipulation 55
 Ingested and Applied Substances 56
 Energy-Based Therapies 67
 Psychologic or Mind-Body Therapies 69
 Spiritual Healing 70
Nursing Implications 71
 Implications for Women's Health 71
 Implications for Practice 72
Nursing Process 72
 Assessment 72
 Nursing Diagnoses 72
 Outcome Identification 72
 Planning 72
 Nursing Intervention 72
 Evaluation 72
Case Study and Care Plan 73

CHAPTER 4

ETHICS, LAWS, AND STANDARDS OF CARE / 79

Ethical Issues 80
 Basic Ethical Perspectives 82

Ethical Principles 84
 Code for Nurses 87
 Ethical Decision-Making Model 87
 Selected Dilemmas in Maternal-Child Practice 88
Case Study and Care Plan 91
Legal Issues 95
 Basic Legal Concepts 95
 Standards of Care 96
 Practicing Safely in Perinatal Settings 96
 Legal Issues in Maternal-Child Practice 97

UNIT 2

Health Care of Women across the Lifespan / 105

CHAPTER 5

PROMOTING WOMEN'S HEALTH / 107

Women's Development Across the Lifespan 108
 Adolescence 108
 Young Adulthood 113
 Perimenopausal Years 114
 Mature Years 117
 Nursing Implications 118
Women's Nutrition Across the Lifespan 118
 Nutritional Guidelines 119
 Nutrition across the Lifespan 121
 Nutrition Essentials 121
 Nutritional Concerns 126
 Nursing Implications 128
Intimate Partner Violence 128
 Intimate Partner Violence Behaviors 129
 Cultural Influences 130
 The Phases of Violence 130
 IPV in Pregnancy 131
 Talking to Women about IPV 131
 Nursing Implications 132

CHAPTER 6

HEALTH CARE ISSUES AND REPRODUCTIVE CONCERNS / 137

Historical Perspective of Women's Health 138
 History of Reproductive Health Care in the United States 138
 Current View of Women's Health Care 139
 Sociocultural Influences 139
 National Response to Women's Health Issues 139
Demographic Data for American Women 140
 Population Shift 140
 Race and Ethnicity 141
 Birth Statistics 141
 Employment 141
 Education 142

Marital Status	142
Fertility and Birth Rates	142
Mortality and Morbidity	143
Leading Causes of Death	143
Cardiovascular Disease	143
Cancer	145
Case Study and Care Plan	155
Chronic Conditions	159
Autoimmune Disorders	160
Urinary Incontinence	160
Mental Illness	160
Substance Abuse	161
Age-Specific Issues	161
Infancy to Young Adulthood	161
Young Adulthood to Perimenopausal Years	162
Perimenopausal to Mature Years	163
Mature Years	163
Health Promotion and Disease Prevention	163
Types of Preventive Services	164
Women's Health Conditions	164
Menstrual Cycle Abnormalities	164
Breast Conditions	170
Pelvic Conditions	175
Menopause	182
Case Study and Care Plan	184

UNIT 3

Human Reproduction / 193

CHAPTER 7

REPRODUCTION, SEXUALITY, INFERTILITY, AND FAMILY PLANNING / 195

Normal Sexual Differentiation	196
Female Reproductive Function	197
Male Reproductive Function	199
Sexuality	200
Human Sexual Response	201
American Sexual Practices	203
Sexual Preferences	203
Pregnancy and Sexuality	205
Sexuality and Aging	205
Sexual Dysfunction	206
Evaluation of Sexual Dysfunction	206
Infertility	206
Factors Affecting Fertility	207
Assessment of the Infertile Couple	209
Physical Assessment and Diagnostic Tools	209
Management of Infertility	212
Nursing Implications	214
Family Planning	214
Reproductive Decision Making	215
Contraceptive Methods	219
Nursing Implications	236

CHAPTER 8

GENETICS AND GENETIC COUNSELING / 241

Chromosomal Basis of Inheritance	242
Patterns of Chromosome Anomalies	242
Distribution of Chromosomes during Cell Division ..	244
Gene Structure and Function	246
Single-Gene (Mendelian) Inheritance	246
Dominant Gene Inheritance Pattern	246
Recessive Gene Inheritance Pattern	248
Polygenic and Multifactorial Inheritance	249
Single-Gene Disorders	250
Autosomal Dominant Disorders	250
Autosomal Recessive Disorders	251
X-Linked Disorders	253
Chromosome Abnormalities	254
Numerical Abnormalities of the Autosomes	254
Numerical Abnormalities of the Sex Chromosomes	256
Structural Chromosomal Abnormalities	256
Genetic Screening	256
Genetic Counseling	257
Prenatal Diagnosis	258
Nursing Implications	259

UNIT 4

Pregnancy / 265

CHAPTER 9

NORMAL PREGNANCY / 267

Signs of Pregnancy	268
Presumptive Signs	268
Probable Signs	268
Positive Signs	269
Expected Date of Delivery	270
Physiologic Adaptation to Pregnancy	270
Reproductive System	270
Hematologic System	272
Cardiovascular System	274
Respiratory System	275
Gastrointestinal System	277
Endocrine System	278
Urinary System	280
Integumentary System	281
Musculoskeletal System	282
Eyes	282
Discomforts of Pregnancy	282
Nausea and Vomiting of Pregnancy	282
Heartburn	284
Constipation	284
Fatigue	284
Frequent Urination	285
Epistaxis and Nasal Congestion	285
Varicosities	285

Hemorrhoids.....	285
Back Pain.....	285
Leg Cramps.....	286
Health Promotion.....	287
Exercise.....	288
Employment.....	288
Travel.....	288
Smoking.....	288
Alcohol Use.....	288
Illicit Drug Use.....	288
Medication Use.....	289
Immunizations.....	289
Psychosocial Adaptations to Pregnancy.....	289
Psychological Responses to Pregnancy.....	289
Body Image Changes.....	290
Becoming a Mother.....	290
Becoming a Father.....	292
The Family.....	293
Cultural Caring.....	294
Complementary Therapies.....	295
Nursing Process.....	295
Assessment.....	295
Nursing Diagnoses.....	296
Outcome Identification.....	296
Planning.....	296
Nursing Intervention.....	296
Evaluation.....	297
Case Study and Care Plan.....	297
 CHAPTER 10	
NURSING CARE OF THE	
PREGNANT WOMAN / 305	
Benefits of Early Prenatal Care.....	306
Facilitation of Client Access to Care.....	306
Preconception Care.....	306
Collaborative Care.....	308
The Prenatal Health Care Team.....	308
Prenatal Care.....	308
Pregnancy Confirmation.....	308
Estimation of Due Date.....	309
Determination of Gravidity and Parity.....	309
Components of Prenatal Care.....	309
Managing the Discomforts	
of Pregnancy.....	326
Urinary Frequency.....	327
Nausea and Vomiting.....	327
Indigestion.....	328
Constipation and Hemorrhoids.....	328
Edema of Lower Extremities.....	328
Round Ligament Discomfort.....	328
Nutrition in Pregnancy and Lactation.....	330
Dietary Supplements in Pregnancy.....	331
Ingestion of Harmful Substances.....	331
Education of the Childbearing Family.....	332
Perinatal Education and Preparation	
for Childbirth.....	332

Childbirth Preparation.....	333
Strategies for Labor Management.....	334
Parenting, Role Transition, and	
Family Adaptation.....	337
Additional Classes Offered to Childbearing	
Families.....	337
Preparation for the Perinatal Educator Role.....	338
Cultural Considerations in Childbirth	
Preparation.....	340
Nursing Process.....	341
Assessment.....	341
Nursing Diagnoses.....	341
Outcome Identification.....	341
Planning.....	341
Nursing Intervention.....	341
Evaluation.....	341
Case Study and Care Plan.....	342

CHAPTER 11**MANAGEMENT AND NURSING CARE
OF HIGH-RISK CLIENTS / 349**

Prespectives on Care.....	350
Hemorrhagic Disorders.....	351
Abortion.....	351
Ectopic Pregnancy.....	352
Gestational Trophoblastic Disease.....	352
Placental Abnormalities.....	354
Placenta Previa.....	354
Abruptio Placentae.....	355
Labor Disorders.....	356
Incompetent Cervix.....	356
Preterm Labor and Premature Rupture	
of Membranes.....	356
Postterm Pregnancy.....	359
Disorders of Amniotic Fluid Volume.....	359
Polyhydramnios.....	359
Oligohydramnios.....	360
High-Risk Fetal Conditions.....	360
Multiple Gestation.....	360
Rh Isoimmunization and ABO Incompatibility.....	361
Hypertension.....	362
HELLP Syndrome.....	363
Endocrine Disorders.....	365
Diabetes.....	365
Hypothyroidism.....	367
Hyperthyroidism.....	368
Cardiovascular Disorders.....	369
Clinical Presentation.....	369
Management.....	369
Nursing Care.....	370
Pulmonary Disorders.....	370
Asthma.....	370
Tuberculosis.....	371
Influenza.....	371
Renal and Urinary Disorders.....	372
Incidence.....	372
Clinical Presentation.....	372

Management 372
 Nursing Care 372
Hematologic Disorders 372
 Thrombophilia in Pregnancy 372
 Gestational Thrombocytopenia 372
 Sickle Cell Syndrome 373
 Thalassemia 373
Neurologic Disorders 374
 Seizure Disorders 374
Pregnancy in HIV-Infected Women 375
 Incidence and Significance 375
 Screening, Testing, and Diagnosis 375
 Clinical Manifestations of HIV Infection
 in Pregnant Women 376
 Clinical Manifestations of HIV in Neonates 377
 Nursing Implications 378
Pregnancy in Adolescence 379
 Incidence and Significance 379
Case Study and Care Plan 380
 Infant and Child Outcomes 382
 Adolescent Psychosocial Development 382
 Issues Related to Adolescent Sexuality,
 Pregnancy, and Parenting 383
 Nursing Implications 386
 Prenatal Care, Labor and Delivery, and
 Postpartum Care 386
Case Study and Care Plan 389

CHAPTER 12

FETAL DEVELOPMENT / 399

Cell Division 400
Implantation and Fertilization 400
Placenta 401
 Functions of the Placenta 402
 Placental Circulation 403
 Fetal Circulation 404
 Newborn Circulation 405
Umbilical Cord 405
Membranes and Amniotic Fluid 405
Embryonic Stage 405
 Three Weeks 405
 Four Weeks 406
 Five Weeks 406
 Six Weeks 407
 Seven Weeks 407
 Eight Weeks 407
Fetal Stage 407
 9 to 12 Weeks 407
 13 to 16 Weeks 407
 17 to 19 Weeks 407
 20 to 23 Weeks 407
 24 Weeks 411
 25 to 28 Weeks 411
 29 to 32 Weeks 411
 33 to 36 Weeks 411
 38 to 40 Weeks 412

Risks Affecting Fetal Well-Being 412
 Environmental Risks 413
 Risks Related to Employment 413
 Risks Related to Home Environment and
 Lifestyle 413
 Infections 418
Nursing Intervention 423
Evaluation 423
Case Study and Care Plan 425

CHAPTER 13

FETAL ASSESSMENT / 433

**Evaluation of Fetal Well-Being in
 Pregnancy** 435
 Purpose 435
 Process 435
 Consequences 435
 Genetic and Biochemical Evaluation 436
 Physical and Psychological Surveillance 443
 Fetal Behavior Studies 450
 Group B Streptococcus Screening 453
Nursing Process 453
 Assessment 453
 Nursing Diagnoses 454
 Outcome Identification 455
 Planning 455
 Nursing Intervention 455
 Evaluation 455
Case Study and Care Plan 456

UNIT 5

Childbirth / 461

CHAPTER 14

**PROCESSES OF LABOR AND
 DELIVERY / 463**

Physiology of Labor 464
 Theories for the Onset of Labor 464
 Components of Labor 465
**Signs and Symptoms of Impending
 Labor** 471
 Lightening 471
 Cervical Changes 471
 Braxton Hicks Contractions 471
 Bloody Show 471
 Energy Spurt 471
 Gastrointestinal Disturbances 472
Stages of Labor 472
 First Stage 472
 Second Stage 472
 Cardinal Movements or Mechanisms of Labor 473
 Third Stage 474
Interventions of Labor 475
 Labor Induction 475

Amniotomy	477	Recovery from Anesthesia	545
Augmentation of Labor	477	Precipitous Delivery	546
Forceps-Assisted Birth	478	Case Study and Care Plan	547
Vacuum-Assisted Birth	478	CHAPTER 16	
Cesarean Section	479	HIGH-RISK BIRTHS AND OBSTETRIC	
Maternal Adaptations to Labor	488	EMERGENCIES / 553	
Hematologic System	488	Dysfunctional Labor Patterns	555
Cardiovascular System	488	Hypertonic Labor	555
Respiratory System	488	Hypotonic Labor	560
Renal System	488	Precipitate Labor	561
Gastrointestinal System	488	Fetal Malpresentation and Malposition	563
Endocrine System	488	Breech Presentation	563
Fetal Adaptations to Labor	488	Shoulder Presentation	565
Fetal Heart Rate	488	Face Presentation	566
Fetal Respiratory System	489	Malpositions	567
Fetal Circulation	489	Case Study and Care Plan	568
		Maternal and Fetal Structural Anomalies	571
CHAPTER 15		Cephalopelvic Disproportion	571
NURSING CARE OF THE INTRAPARTAL		Macrosomia	571
FAMILY / 495		Multiple Gestation	573
Assessment of the Physiologic Process		Fetal Distress	575
of Labor	496	Uterine Rupture	576
Maternal Status	497	Placental Abnormalities	578
Labor Onset	497	Placenta Previa	578
Initial Status Assessment	497	Abruptio Placentae	579
Informed Consent	498	Other Placental Anomalies	580
Risk Factors	498	Umbilical Cord Anomalies	580
Expected Date of Delivery	499	Amniotic Fluid Anomalies	583
Problems with Present Pregnancy	499	Polyhydramnios	583
Health History	500	Oligohydramnios	583
Fetal Status	502	Amniotic Fluid Embolism	584
Labor Status	502	CHAPTER 17	
Uterine Activity	502	PAIN MANAGEMENT IN LABOR AND	
Fetal Membrane Status	505	DELIVERY: ANALGESIA AND	
Cervical Status and Fetal Descent	507	ANESTHESIA / 591	
General Systems Assessment	509	Theories of Pain and Pain Management	592
Vital Signs	509	Non-Pharmacologic Pain Relief	592
Abdomen	510	Position and Movement	593
Bladder	511	Counter Pressure and Related Techniques	594
Lower Extremities	511	Intradermal Sterile Water Injections	594
Edema	511	Birthing Ball	595
Deep Tendon Reflexes	511	Hydrotherapy	595
Setting Priorities and Making Decisions	512	Heat and Cold	595
Maternal-Family Support and Interactions	512	History of Analgesia for Childbirth	596
Psychologic Considerations During the		Analgesia and Anesthesia	596
Latent Phase of Labor	513	Types of Anesthesia	596
Documentation and Communication	514	Pain in Labor and Delivery	597
Laboratory Tests	514	Types of Pain	597
Urine Specimen Analysis	514	Considerations in Medication for Pain	598
Blood Tests	514	Client Experiences with Pain	598
Nursing Responsibilities During Labor	514	Nursing Implications	598
Nursing Care in the First Stage	514	Analgesia in Labor	598
Second Stage	520	Parenteral Analgesia	602
Third Stage	535		
Fourth Stage (Recovery)	543		
Transfer to the Postpartum Unit	545		

Regional Analgesia 602
 Preparation of the Client 603
Anesthesia for Delivery 606
 Local Infiltration 607
 Regional Anesthesia 607
 Pudendal Block 607
 Spinal Anesthesia 607
 Epidural Anesthesia 608
 General Anesthesia 612
 Special Considerations for Cesarean Section 614
Post-Delivery Care for the Client Receiving Anesthesia 614
 Local Anesthesia 614
 Regional Anesthesia 614
 General Anesthesia 614

UNIT 6

Postpartum Nursing Care / 619

CHAPTER 18
NURSING CARE OF THE LOW-RISK POSTPARTUM FAMILY / 621

Postpartum Care 622
Mother-Baby Nursing 622
 Infant Security 624
 Hospital Length of Stay 624
Clinical Assessment 625
 Immediate Postpartum Care 626
 Routine Postpartum Care 626
 Physical Assessment 627
 Episiotomy 639
 Extremities 641
 Emotional Status 641
Other Assessments 642
 Hemodynamic Status 642
 Integumentary System 642
 Musculoskeletal System 643
 Activity 643
 Exercise 644
 Weight Loss 644
 Sexuality 645
 Contraception 646
 Pain Management 647
 Immune System 647
 Documentation 649
Family Considerations 649
 Maternal-Infant Attachment 651
 Maternal Adjustment and Role Attainment 651
 Paternal Adjustment 653
 Infant Behaviors Influencing Attachment 653
 Sibling Adjustment 654
 Grandparent Adjustment 655
 The Postpartum Adolescent Mother 656

Discharge Preparation 657
Nursing Implications 658
Nursing Process 658
 Assessment 658
 Nursing Diagnoses 658
 Outcome Identification 659
 Planning 659
 Nursing Intervention 659
 Evaluation 659
Case Study and Care Plan 659

CHAPTER 19
COMPLICATIONS OF POSTPARTUM AND NEONATAL LOSS / 667

Postpartum Physical Complications 668
 Postpartum Hemorrhage 668
 Puerperal Hematoma 672
 Postpartum Infections 672
 General Approach to Management of Infection 676
 Endometritis 676
 Mastitis 677
Case Study and Care Plan 677
Postpartum Psychologic Disorders 681
 Postpartum Blues 681
 Postpartum Depression 681
 Postpartum Psychosis 681
Nursing Implications and Preparation for Discharge 682
Client Education 683
Losses in the Postpartum Period 684
 Grief and Neonatal Death 685
 Reproductive Loss 685
 Loss of the Perfect Baby 686
 Sudden Infant Death 687
 Relinquishment 688
 Caring for the Grieving Family 688
 Creating Memories and Finding Meaning 690
 Staff Education and Support 690
Nursing Process 691
 Assessment 691
 Nursing Diagnoses 692
 Outcome Identification/Planning 692
 Nursing Intervention 692
 Evaluation 693
Case Study and Care Plan 693

CHAPTER 20
LACTATION AND NEWBORN NUTRITION / 701

Infant Nutrition 702
Growth and Development 702
 Energy 703
 Protein 704
 Fat 704
 Carbohydrates 705

Water and Electrolytes	705
Minerals	705
Trace Elements	705
Water-Soluble Vitamins	706
Fat-Soluble Vitamins	707
Breastfeeding	707
Benefits to the Infant	708
Benefits to the Mother	708
Benefits to the Community	708
Biology of Lactation	709
Anatomy of the Breast	709
Physiology of Lactation: Hormones and Processes	709
Establishment of Milk Supply	711
Maternal Health, Diet, and Medications	711
Promoting Successful Breastfeeding	712
Nursing Implications	717
Overcoming Barriers to Breastfeeding	717
Return to Work	723
Tandem Nursing and Breastfeeding Multiples	723
Contraindications to Breastfeeding	723
Management of Breastfeeding Problems	724
Alternative Therapy for Breastfeeding Problems	727
Milk Expression and Storage	728
Weaning	729
Resources for Breastfeeding Mothers	730
Nursing Implications	730
Overcoming Barriers	730
Commercial Infant Formula	732
Specialized Formulas	735
Introduction of Solid Foods	735
Nursing Implications	737
Nursing Process	737
Assessment of the Nursing Pair	738
Nursing Diagnoses	738
Outcome Identification	738
Planning	738
Nursing Intervention	738
Evaluation	738
Case Study and Care Plan	738

Nursing Process	754
Assessment	755
Nursing Diagnosis	755
Outcome Identification	755
Planning	755
Nursing Intervention	755
Evaluation	755
Metabolic Transition	755
Gastrointestinal System Transition	755

Neurobehavioral Transition in the First 12 Hours	756
First Period of Reactivity	756
Period of Decreased Activity	757
Second Period of Reactivity	757
Implications for Parent, Family, and Newborn Interaction	757
Assessment Strategies and Newborn Competencies	757

Complications of Transition	758
Common Complications	758
Major Pathologies That Affect Transition	761

Case Study and Care Plan	762
Transition of the Premature Infant	764
Complications of Pulmonary System Transition	764
Complications of Cardiac System Transition	764

Resuscitation and Stabilization in the Delivery Room	765
---	-----

CHAPTER 22
NURSING CARE OF THE
NORMAL NEWBORN / 771

Assessment After Transition	772
Temperature	772
Cardiovascular System	773
Respiratory System	773
General Nursing Care	774

General Assessment	776
Position	776
Skin Color	776
Body Size	778
Reactivity	779
Identification	780

Physical Examination	780
Weight, Measurement, and Vital Signs	780
Gestational Age Assessment	781
Systems Assessment	792

Additional Assessments	813
Periodic Shift Assessment	813
Quick Examination	814
Interactional Assessment	814

Factors that Place the Infant at Risk	816
Physical	816
Psychologic	816
Family	817

UNIT 7

Newborn Development and Nursing Care / 747

CHAPTER 21
TRANSITION TO EXTRAUTERINE LIFE / 749

Physiologic Transitions of Major Systems	750
Pulmonary System Transition	750
Cardiac System Transition	751
Thermoregulation	751

Environment	817
Illness and Infection	817
Nursing Implications	818
Promotion of Physiologic Stability	818
Newborn Care	818
Sleep and Activity	818
Cord and Skin Care	819
Criteria for Discharge	819

CHAPTER 23

CARE OF NEWBORNS AT RISK RELATED TO BIRTH WEIGHT AND PREMATURE DELIVERY / 825

The Small for Gestational Age Infant	826
Intrauterine Growth Restriction	827
Factors Associated with Fetal Growth Restriction	827
Complications Associated with the SGA Infant	827
Assessment	827
Care	828
Outcome and Follow-up	828
The Large for Gestational Age Infant	828
Associated Factors	828
Complications	828
Assessment and Care	828
The Premature Infant	829
Factors Associated with Preterm Delivery	829
Assessment of the Preterm Infant	829
Physical Assessment	830
Review of Systems	831
Special Considerations in Caring for the Infant at High Risk	840
Families and the High-Risk Infant	840
Ethical Considerations	841
Fluid and Nutrition Management	843
Electrolyte Management	844
Glucose Homeostasis	844
Feeding	844
Pain Assessment and Management	846
Developmental Care	850

Neonatal Transport	862
Maternal Transport versus Neonatal Transport	863
Neonatal Transport Team	863
Back Transport	863
Discharge Planning	863
Case Study and Care Plan	865

CHAPTER 24

CARE OF NEWBORNS AT RISK RELATED TO CONGENITAL AND ACQUIRED CONDITIONS / 875

Congenital Anomalies	876
Central Nervous System Anomalies	876
Respiratory System Anomalies	879
Cardiovascular System Anomalies	881
Gastrointestinal System Anomalies	882
Genitourinary System Anomalies	886
Musculoskeletal System Anomalies	887
Acquired Disorders	890
Trauma and Birth Injuries	890
Infants of Diabetic Mothers	892
Hyperbilirubinemia	893
Polycythemia	894
Jaundice	894
Neonatal Infections	896
Sepsis	896
Family Experiences	897
Nursing Process	897
Assessment	897
Nursing Diagnoses	898
Outcome Identification	898
Planning	898
Nursing Intervention	898
Evaluation	899
Case Study and Care Plan	899
Appendix A: Abbreviations and Acronyms	906
Glossary	911
Index	929
