

PUBLIC HEALTH RESEARCH METHODS

GRANT
EMILY E. NAMEY
Editors

BRIEF CONTENTS

Preface	xxi
Acknowledgments	xxiii
About the Editors	xxv
About the Contributors	xxvii
Chapter 1: Introduction to Public Health Research Methods	1
<i>Greg Guest</i>	
PART I—PLANNING AND PREPARING FOR RESEARCH	31
Chapter 2: Designing Research	33
<i>Heidi W. Reynolds and Greg Guest</i>	
Chapter 3: Research Ethics and Working With Institutional Review Boards	69
<i>Amy Corneli and David Borasky</i>	
Chapter 4: Community Engagement in Public Health Research	101
<i>Dázon Dixon Diallo and Paula M. Frew</i>	
IN FOCUS: COMMUNITY-BASED PARTICIPATORY RESEARCH	123
<i>Karen Hacker and Greg Guest</i>	
PART II—TRADITIONAL EPIDEMIOLOGIC METHODS AND DESIGNS	129
Chapter 5: Public Health Surveillance and Research: From Data to Action	131
<i>Donna F. Stroup, Steven B. Thacker, and C. Kay Smith</i>	
Chapter 6: Outbreak Investigation	161
<i>Douglas H. Hamilton</i>	
Chapter 7: Cohort and Case-Control Studies	197
<i>Lee Warner and Deborah Dee</i>	
Chapter 8: Designing Randomized Controlled Trials	223
<i>Theresa Gamble, Danielle Haley, Raymond Buck, and Nirupama Sista</i>	

PART III—STRUCTURAL AND OPERATIONAL RESEARCH	251
Chapter 9: Using Secondary Data	253
<i>Sarah Boslaugh</i>	
Chapter 10: Economics of Population Health	279
<i>Emma McIntosh, Lyndal Bond, Cam Donaldson, Kenny Lawson, and Helen Mason</i>	
IN FOCUS: COST ANALYSIS FOR INTERVENTIONS	307
<i>Rick Homan</i>	
Chapter 11: Health Services Research	311
<i>Heidi W. Reynolds</i>	
PART IV—BEHAVIORAL AND SOCIAL SCIENCE RESEARCH	339
Chapter 12: Survey Design and Implementation	341
<i>Kathy Hageman, Andrea Kim, Travis Sanchez, and Jeanne Bertolli</i>	
Chapter 13: Scale Development and Validation	379
<i>Glenn Gamst, Lawrence S. Meyers, Holly McClain Burke, and A. J. Guarino</i>	
Chapter 14: Social Network Analysis: Methods and Applications in Public Health	411
<i>Elizabeth Costenbader and Thomas W. Valente</i>	
Chapter 15: Qualitative Research Methods	443
<i>Emily E. Namey and Robert T. Trotter II</i>	
Chapter 16: Randomized Controlled Trials for Psychosocial Interventions	483
<i>Phyllis Solomon and Mary Cavanaugh</i>	
PART V—CROSS-CUTTING METHODS AND APPROACHES	509
Chapter 17: Sampling: The Foundation of Good Research	511
<i>Johnnie Daniel</i>	
Chapter 18: Statistical Methods in Public Health Research	553
<i>Mark A. Weaver</i>	
Chapter 19: Mixed Methods Research	581
<i>Greg Guest and Paul Fleming</i>	
IN FOCUS: USING VIGNETTES IN PUBLIC HEALTH RESEARCH	611
<i>Paul Fleming and Michael Stalker</i>	

Chapter 20: Geographic Information Systems (GIS) in Public Health <i>Candace Nykiforuk</i>	615
Chapter 21: Public Health 2.0: Fresh Approaches to Old Problems <i>Hans C. Ossebaard and Lisette van Gemert-Pijnen</i>	649
IN FOCUS: MOBILE DATA COLLECTION TECHNIQUES <i>Mitesh Thakkar, Nikhil Wilmink, Rachna Nag Chowdhuri, and Sruthi Chandrasekaran</i>	677
PART VI—APPLYING RESEARCH FINDINGS	683
Chapter 22: Enhancing Research Utilization <i>Jeffery C. Peterson and Angie M. Funaiole</i>	685
Chapter 23: Implementation Science: Identifying the Path From Innovation to Impact <i>Temina Madon</i>	707
APPENDIX: Theories and Models in Public Health Research	723
Author Index	747
Subject Index	769

DETAILED CONTENTS

Preface	xxi
Acknowledgments	xxiii
About the Editors	xxv
About the Contributors	xxvii
Chapter 1: Introduction to Public Health Research Methods	1
<i>Greg Guest</i>	
A Brief History of Public Health Research	3
<i>The Emergence of Observational and Quasi-Experimental Designs</i>	5
<i>Chronic Disease and the Rise of Case-Control and Cohort Studies</i>	8
<i>Randomized Controlled Trials</i>	10
<i>Structural Determinants, Multi-Causality, and the “New Epidemiology”</i>	11
<i>The Rise of Behavioral Epidemiology</i>	13
<i>The Incorporation of “New” Social and Behavioral Research Methods</i>	15
<i>Foundational Elements of Public Health Research</i>	16
<i>More Recent Methodological Approaches</i>	17
From Research to Policy and Practice	21
Coming Full Circle: Preparing for Research	21
Global Health	23
Additional Resources	25
References	25
PART I—PLANNING AND PREPARING FOR RESEARCH	31
Chapter 2: Designing Research	33
<i>Heidi W. Reynolds and Greg Guest</i>	
The Big Picture	33
Find Your Focus	34
<i>Identify the Research Problem</i>	34
<i>Specify Research Objectives</i>	36
<i>Transform Objectives Into Research Questions and Hypotheses</i>	37
Narrow Your Focus	44
<i>Decide on the Type of Research Study and Design(s)</i>	44
<i>Clarify Units of Observation and Units of Analysis</i>	50
<i>Determine Sample and Recruitment Procedures</i>	51
<i>Operationalize Study Measures</i>	51

Define Data Collection and Management Procedures	55
<i>Decide on the Mechanics of Data Collection</i>	55
<i>Develop Data Entry, Storage, and Transmission Standards</i>	57
<i>Data Sharing</i>	58
Consider External Logistics	58
<i>Research Scope, Time, and Resources</i>	58
<i>Consider Research Site Context</i>	58
Document the Research Plan	60
<i>Develop a Protocol</i>	60
<i>Draft an Analysis Plan</i>	61
<i>Plan for Communicating Results</i>	61
Summary	62
Additional Resources	66
References	67
Chapter 3: Research Ethics and Working With	
Institutional Review Boards	69
<i>Amy Corneli and David Borasky</i>	
Ethics Guidelines and Regulations	70
<i>Nuremburg Code</i>	70
<i>Declaration of Helsinki</i>	71
<i>The Belmont Report</i>	71
<i>The Council for International Organizations of</i>	
<i>Medical Sciences Guidelines</i>	72
<i>U.S. Code of Federal Regulations</i>	73
Planning Your Research	74
<i>What Ethical Issues Should Be Considered When Developing a</i>	
<i>Research Idea Into a Research Protocol?</i>	74
Institutional Review Boards	88
<i>What Is an Institutional Review Board?</i>	88
<i>What Documents Must Be Submitted to the IRB?</i>	89
<i>What Happens After I Submit My Protocol to the IRB?</i>	89
<i>Will More Than One IRB Need to Review</i>	
<i>My Research?</i>	90
<i>Does the IRB Need to Review Approved Research on an</i>	
<i>Ongoing Basis?</i>	90
The Global Research Landscape	93
<i>Local Ethics Review</i>	93
<i>Practical Issues When Working</i>	
<i>With Local IRBs</i>	94
Current Issues and Future Directions	95
<i>Bioethics</i>	95
<i>Research Using the Internet</i>	95
Conclusion	95
Additional Resources	96
References	97

Chapter 4: Community Engagement in Public Health Research	101
<i>Dázon Dixon Diallo and Paula M. Frew</i>	
Definitions and Constructs in Community Engagement (CE)	102
Community Engagement in Public Health Research	105
<i>CE and HIV Prevention Research</i>	105
A Framework for the Community Engagement Process	107
<i>Guiding Values and Principles</i>	107
<i>Enacting Community Engagement</i>	108
<i>An Example of Successful Community-Academic Partnership</i>	112
Community Engagement in the Global Context	116
<i>The CAPRISA Model</i>	117
<i>The Navrongo Model</i>	117
Emerging Trends and Future Directions	118
Additional Resources	119
References	119
IN FOCUS: COMMUNITY-BASED PARTICIPATORY RESEARCH	123
<i>Karen Hacker and Greg Guest</i>	
PART II—TRADITIONAL EPIDEMIOLOGIC METHODS AND DESIGNS	129
Chapter 5: Public Health Surveillance and Research:	
From Data to Action	131
<i>Donna F. Stroup, Steven B. Thacker, and C. Kay Smith</i>	
A Brief History	132
Applications to Public Health Research	134
The Contribution of Public Health Surveillance to Research	135
<i>Documenting the Magnitude of the Problem</i>	136
<i>Revealing the History of a Disease</i>	136
<i>Generating and Testing Research Hypotheses</i>	137
<i>Detecting Epidemics</i>	137
<i>Documenting Disease Distribution and Spread</i>	138
<i>Epidemiologic and Laboratory Research</i>	138
<i>Evaluation Research</i>	138
<i>Research on Changes in Infectious Agents</i>	140
<i>Health Practice Research</i>	141
<i>Policy Research</i>	141
Practical Guidance for Public Health Surveillance	142
<i>Getting to Know a Surveillance System</i>	142
<i>Using Data From a Surveillance System</i>	145
Global Public Health Research and Surveillance	148
<i>Global Guidelines</i>	148
<i>Examples of Surveillance and Research in a Global Context</i>	149

Challenges to Research Using Surveillance Data	150
<i>Bioterrorism and Disaster Preparedness</i>	150
<i>Electronic Developments</i>	151
<i>Behavioral Surveillance</i>	153
<i>The Role of Surveillance in Research Addressing Health Disparities</i>	153
Additional Resources	154
References	154
Chapter 6: Outbreak Investigation	161
<i>Douglas H. Hamilton</i>	
Outbreak Investigation as Public Health Research and Practice	161
Conducting an Outbreak Investigation	163
<i>Prepare for Field Work</i>	163
<i>Verify the Diagnosis</i>	165
<i>Confirm the Outbreak</i>	166
<i>Identify and Count Cases</i>	169
<i>Tabulate and Orient the Data—Time, Place, and Person</i>	173
<i>Formulate and Test Hypotheses</i>	187
<i>Implement and Evaluate Control Measures</i>	187
<i>Communicate Findings</i>	189
Outbreak Investigation: A Case Study	190
<i>Background</i>	190
<i>Recognition of the Outbreak</i>	190
<i>Conclusion</i>	193
Current Issues and Future Directions	193
Additional Resources	194
References	194
Chapter 7: Cohort and Case-Control Studies	197
<i>Lee Warner and Deborah Dee</i>	
A Brief History	197
Key Concepts and Definitions	199
<i>Cohort Studies</i>	199
<i>Case-Control Studies</i>	202
<i>Limitations of Observational Designs</i>	205
Relevance of Cohort and Case-Control Research Studies to Public Health	208
<i>Cohort Study Exemplars</i>	209
<i>Case-Control Study Exemplars</i>	209
Planning, Implementing, and Interpreting Cohort and Case-Control Studies	210
<i>Appropriate Uses of Cohort Studies</i>	211
<i>Appropriate Uses of Case-Control Studies</i>	211
<i>Measures of Association in Cohort Studies</i>	212
<i>Measures of Association in Case-Control Studies</i>	215
<i>Interpreting Causation</i>	217

Future Directions	219
Additional Resources	219
References	220
Chapter 8: Designing Randomized Controlled Trials (RCTs)	223
<i>Theresa Gamble, Danielle Haley, Raymond Buck, and Nirupama Sista</i>	
The Basics of Randomized Controlled Trials	224
<i>Definition of Randomized Controlled Trial</i>	224
<i>Phases of Clinical Research</i>	225
<i>Study Objectives and Study Endpoints</i>	230
<i>Definition of Control</i>	233
<i>Defining the Study Population:</i>	
<i>Inclusion/Exclusion and Size</i>	235
<i>Randomization</i>	238
<i>Settings for RCTs</i>	240
Special Considerations for RCTs	242
<i>Strengths</i>	242
<i>Limitations</i>	242
The Relevance of RCTs for Public Health	243
<i>Informing Public Health Policy</i>	244
<i>Guidelines for Disease Prevention and Treatment</i>	245
<i>Making Drugs and Devices Available to the</i>	
<i>General Public</i>	246
<i>Determining the Cost Effectiveness of Interventions</i>	246
Future Directions	246
Additional Resources	247
References	247
PART III—STRUCTURAL AND OPERATIONAL RESEARCH	251
Chapter 9: Using Secondary Data	253
<i>Sarah Boslaugh</i>	
Advantages and Disadvantages of Secondary Data Analysis	256
How to Do Secondary Data Analysis	258
Some Issues in Secondary Data Analysis	263
<i>Complex Survey Designs</i>	263
<i>Changes in Measurement</i>	264
<i>Causation</i>	266
Domestic Sources	266
International Sources (and Special Challenges	
of Working With Them)	269
Other Types of Data	273
<i>Administrative Data</i>	273
<i>Vital Statistics</i>	273
<i>Ecological Data</i>	274

Current Issues and Future Directions	274
<i>Data Sharing</i>	274
Additional Resources	275
References	275
Chapter 10: Economics of Population Health	279
<i>Emma McIntosh, Lyndal Bond, Cam Donaldson, Kenny Lawson, and Helen Mason</i>	
What Is Health Economics?	279
The Need for Economic Evaluation in Population Health:	
Scarcity and Value	280
Basic Concepts in Economic Evaluation	283
<i>Cost Effectiveness Analysis and Cost-Utility Analysis</i>	283
<i>Cost-Consequence Approach</i>	284
<i>Two Key Aims: Efficiency and Equity</i>	285
<i>Health Care Evaluation Versus Evaluations of Health Interventions</i>	286
<i>Opportunity Cost and Marginal Analysis</i>	287
Considerations for Economic Evaluation of Population	
Health Interventions	290
<i>Perspective</i>	290
<i>Measuring the Benefits of Population Health Interventions</i>	291
<i>Costing "Rules" for Multi-Sectoral Population Health Interventions</i>	298
<i>The Role of Modeling in Economic Evaluation</i>	301
Case Studies	303
<i>Keep Well: Scotland's Targeted CVD Primary Prevention Program</i>	303
<i>The Cost-Effectiveness of Salt Reduction</i>	304
Conclusion	305
Additional Resources	305
References	305
IN FOCUS: COST ANALYSIS FOR INTERVENTIONS	307
<i>Rick Homan</i>	
Chapter 11: Health Services Research	311
<i>Heidi W. Reynolds</i>	
A Brief History	311
Global Context	312
Beneficiaries of Health Services Research (HSR)	313
The Interdisciplinary Nature of HSR	313
Contributions of HSR to Public Health	315
<i>Organizing and Financing of Health Services</i>	315
<i>Access to Health Care</i>	317
<i>Quality of Care</i>	319
<i>Behavior of Providers and Patients</i>	320
<i>Clinical Evaluation and Outcomes Research</i>	320

<i>Informatics in Measurement and Decision Making</i>	321
Program Inputs, Outcomes, Efficacy, and Effectiveness	322
Data Collection Methods in HSR	325
<i>Mystery Client or Simulated Client Methods</i>	325
<i>Methods to Measure Staff Time</i>	328
<i>Systematic Reviews and Meta-Analysis</i>	331
<i>Scaling Up</i>	332
Current Issues and Future Directions	333
Additional Resources	333
References	334
PART IV—BEHAVIORAL AND SOCIAL SCIENCE RESEARCH	339
Chapter 12: Survey Design and Implementation	341
<i>Kathy Hageman, Andrea Kim, Travis Sanchez, and Jeanne Bertolli</i>	
Use of Surveys to Investigate Social and Behavioral	
Health Determinants	342
Contribution of Surveys to Public Health Research and Practice	342
<i>Purposes of Surveys</i>	342
<i>The Importance of Survey Data and Examples of Their Use</i>	343
Developing and Conducting Surveys	347
<i>Initial Considerations</i>	347
<i>Planning the Survey</i>	349
Conducting Surveys in International Settings	371
<i>Understanding Local Context and Garnering Community Support</i>	371
<i>Logistical Considerations</i>	371
<i>Data Collection and Technology</i>	372
Current Issues and Future Directions	372
<i>Resource Conservation</i>	373
<i>Data Quality</i>	373
<i>Scope</i>	374
<i>Periodicity</i>	374
<i>Technology-Biology Connection</i>	375
<i>Confidentiality</i>	375
Conclusion	376
Additional Resources	376
References	377
Chapter 13: Scale Development and Validation	379
<i>Glenn Gamst, Lawrence S. Meyers, Holly McClain Burke, and A. J. Guarino</i>	
The Essential Elements of Scales	380
<i>Constructs</i>	380
<i>Scales of Measurement</i>	381
<i>Validity of the Inferences Drawn From the Scale Score</i>	382
The Scale Development Process	383
<i>Conceptualizing the Construct</i>	383

<i>Selecting the Response Format</i>	384
<i>Developing the Item Pool</i>	386
<i>Reviewing the Item Pool</i>	389
<i>Selecting Validation Scales</i>	389
<i>Selecting the Sample</i>	390
<i>Preliminary Statistical Evaluation of the Items</i>	392
<i>Performing a Structural Analysis</i>	393
<i>Assessing the Quality of Measurement</i>	395
<i>Assembling Validation Evidence</i>	401
<i>Adopting a Multicultural Perspective</i>	401
Emerging Issues and Future Directions	402
Additional Resources	403
References	403
Chapter 14: Social Network Analysis:	
Methods and Applications in Public Health	411
<i>Elizabeth C. Costenbader and Thomas W. Valente</i>	
The Relevance of Social Network Analysis (SNA) to Public Health	412
The Methods of Social Network Analysis	412
<i>Types of Network Data</i>	412
<i>Data Collection Techniques</i>	414
<i>Measures and Analysis</i>	416
<i>Network-Level Measures</i>	421
<i>Structural Analyses</i>	426
<i>Positional Analyses</i>	426
SNA Applications and Research Fronts in Public Health	429
<i>Interventions</i>	429
<i>Social Capital</i>	430
<i>Exponential Random Graph Modeling</i>	431
<i>Network Dynamics</i>	432
<i>Diffusion/Contagion</i>	433
Current Issues and Future Directions	435
Additional Resources	436
References	437
Chapter 15: Qualitative Research Methods	443
<i>Emily E. Namey and Robert T. Trotter II</i>	
The Qualitative-Quantitative Comparison	443
Defining Qualitative Research	444
Sampling Designs in Qualitative Research	445
Overview of Common Qualitative Research Methods	448
<i>Participant Observation</i>	448
<i>Individual and Group Interview Techniques</i>	453
<i>How Do You Choose (or Know If Someone Has Chosen Wisely)?</i>	457
<i>Additional Qualitative Research Methods That Enhance the Basic Set</i>	460
Qualitative Data Management and Analysis	463

<i>Qualitative Data Management</i>	463
<i>Qualitative Data Analysis</i>	468
<i>Qualitative Data Analysis Software</i>	468
Applications of Qualitative Research Methods to Public Health	470
<i>Behavior and Behavior Change Research</i>	472
<i>Health Communications Research</i>	473
<i>Needs Assessment Research</i>	474
<i>Monitoring and Evaluation Research</i>	475
Qualitative Approaches and Global Health Issues	476
Current Issues and Future Directions	477
Additional Resources	478
References	479
Chapter 16: Randomized Controlled Trials for	
Psychosocial Interventions	483
<i>Phyllis Solomon and Mary Cavanaugh</i>	
Psychosocial Randomized Controlled Trials (RCTs) in Context	484
<i>Effectiveness Versus Efficacy RCTs</i>	484
<i>General Qualities of Psychosocial RCTs</i>	484
Importance of Qualitative Methods to RCTs	486
Designing and Conducting RCTs for Psychosocial Interventions	487
<i>Ethical Considerations</i>	489
<i>Planning Psychosocial Effectiveness</i>	491
<i>Theoretical Basis of Psychosocial RCTs</i>	496
<i>Considerations in Designing a Psychosocial RCT</i>	497
<i>Implementing RCTs</i>	501
Randomized Controlled Trials and Global Health	503
Current Issues and Future Directions	504
Additional Resources	505
References	505
PART V—CROSS-CUTTING METHODS AND APPROACHES	509
Chapter 17: Sampling: The Foundation of Good Research	511
<i>Johnnie Daniel</i>	
Prepare to Select Study Elements	513
<i>What Are the Objectives of the Study?</i>	514
<i>What Is the Target Population?</i>	514
<i>What Is the Nature of the Target Population?</i>	515
<i>What Resources Are Available to Conduct the Study?</i>	516
<i>What Research Design Issues Should Be Considered?</i>	516
Choose Between Sampling or Taking a Census	517
Choose Between Nonprobability Sampling, Probability	
Sampling, and Mixed Methods Sampling	518
<i>Factors Favoring the Use of Nonprobability Sampling</i>	520
<i>Factors Favoring the Use of Probability Sampling</i>	520

<i>Factors Favoring the Use of Mixed Methods Sampling</i>	521
Choose the Sampling Subtype	521
<i>Subtypes of Nonprobability Sampling</i>	521
<i>Subtypes of Probability Sampling</i>	529
<i>Subtypes of Mixed Methods Sampling</i>	534
<i>Additional Sampling Approaches</i>	536
Determine the Sample Size	540
<i>Estimating Probability Sample Sizes</i>	542
<i>Estimating Nonprobability Sample Sizes</i>	543
Select and Recruit the Sample	545
Sampling in International Contexts	548
Future Directions	549
Additional Resources	549
References	550
Chapter 18: Statistical Methods in Public Health Research	553
<i>Mark A. Weaver</i>	
The Basics of Statistical Inference	554
<i>Probability as a Basis for Statistical Inference</i>	554
<i>The Logic of Hypothesis Testing</i>	559
<i>Genesis of a Confidence Interval</i>	561
Basic Comparisons and Advanced Models: Applications in Public Health	563
<i>Unadjusted Comparisons</i>	564
<i>Adjustment via Regression Models</i>	567
<i>Correlated Outcomes</i>	568
<i>Survival Analysis</i>	570
<i>Structural Equation Models</i>	572
Current Issues and Future Directions	574
<i>Alternative Approaches for Nonrandom Samples</i>	574
<i>Meta-Analysis</i>	576
<i>Moving Forward, Looking Back</i>	577
Additional Resources	578
References	578
Chapter 19: Mixed Methods Research	581
<i>Greg Guest and Paul Fleming</i>	
Defining Mixed Methods	581
A Brief Summary of Mixed Methods Typologies	584
Integrating Data	588
<i>Exploratory Sequential Designs</i>	589
<i>Explanatory Sequential Designs</i>	590
<i>Concurrent (Convergent or Parallel) Designs</i>	593
Mixed Methods in Public Health	602
<i>Health Policy</i>	603
<i>Chronic Diseases</i>	603

<i>Design and Evaluation of Implementation Strategies: Proving What Works and Why</i>	717
Addressing Health Disparities	719
Implementation Science in Global Health	719
Current Issues	720
Additional Resources	721
References	721
APPENDIX: Theories and Models in Public Health Research	723
Individual Level	724
<i>Trans-Theoretical Model</i>	724
<i>Health Belief Model (HBM)</i>	725
<i>Information, Motivation, and Behavioral Skills (IMB) Model</i>	726
<i>Locus of Control (LOC) Theory</i>	727
<i>Rational Choice Theory</i>	727
<i>Conservation of Resources (COR) Theory</i>	728
<i>Elaboration Likelihood Model (ELM) of Persuasion</i>	728
<i>Theory of Reasoned Action (TRA)</i>	729
<i>Theory of Planned Behavior (TPB)</i>	730
<i>Precaution Adoption Process Model (PAPM)</i>	731
<i>Protection Motivation Theory (PMT)</i>	731
Interpersonal Level	732
<i>Social Learning Theory (SLT)</i>	732
<i>Social Network Theory (SNT)</i>	733
<i>Gender Theory</i>	733
Community Level	734
<i>Community Coalition Action Theory (CCAT)</i>	734
<i>Natural Helper Model (NHM)</i>	734
<i>Diffusion of Innovations (DOI) Theory</i>	735
<i>Communication Theory</i>	737
Multilevel Approaches	738
<i>Symbolic Interaction Theory (SIT)</i>	738
<i>Theory of Triadic Influence (TTI)</i>	738
<i>Interactive Domain Model (IDM)</i>	739
<i>Social-Ecological Model</i>	740
<i>Behavioral Ecological Model (BEM)</i>	741
