<i>About the Companion Website</i>	xxi

PART 1: APPRAISING RESEARCH 1

1 Research in Nursing	3
Learning outcomes	3
Historical and current context	4
How do we understand the nature of nursing research?	8
Who does research in nursing?	10
What is evidence-based practice?	11
What is the hierarchy of evidence and research?	13
How to involve the public in research	15
What is the relationship between research and nurse education?	16
Chapter summary	17
Suggested further reading	17
Websites	17
References	18
2 Sources of Nursing Knowledge	21
Learning outcomes	21
Scientific knowledge	22
Other sources of knowledge	24
Conceptualising nursing research	27
Chapter summary	28
Suggested further reading	28
Websites	28
References	29

3	The Research Process	31
	Learning outcomes	31
	The stages of the research process	32
	Chapter summary	38
	Suggested further reading	38
	Websites	38
	Reference	38
4	Literature Searching	39
	Learning outcomes	39
	The purpose of searching for literature	40
	Stages in the literature searching process	41
	Chapter summary	51
	Suggested further reading	52
	Websites	52
	References	52
5	Critical Appraisal	53
	Learning outcomes	53
	Why is a critical appraisal needed?	54
	What is reading analytically?	55
	Synthesis	56
	Reading retrieved articles	58
	Critical appraisal tools	58
	Quantitative research critique questions	62
	Qualitative research critique questions	69
	Systematic review critique questions	76
	Chapter summary	77
	Suggested further reading	78
	Websites	78
	References	78
6	Literature Reviewing	79
	Learning outcomes	79
	What is a literature review?	80
	What is the purpose of a literature review?	81
	How do you carry out a literature review for a research project?	81
	How do you write up the summary of the literature in a review?	83
	Referencing the research literature	84
	Chapter summary	85
	Suggested further reading	86
	Websites	86
	References	86

PART 2: PREPARING FOR RESEARCH	87
7 Research Ethics and Governance	89
Learning outcomes	89
Advancing knowledge, protecting from harm and maintaining patient choice	90
Research Governance Framework	95
Research ethics approval	98
Chapter summary	99
Suggested further reading	99
Websites	99
References	100
8 Researching Ethically	101
Learning outcomes	101
Ethical principles	101
Informed consent to participate	103
Obtaining informed consent	105
Anonymity	109
Confidentiality	110
Data storage, retention and security	111
Potential harm to the researchers	112
The dual role of researcher and nurse	113
What members of a research ethics committee are looking for	113
Chapter summary	115
Suggested further reading	116
Websites	116
References	116
9 Developing Research Questions	117
Learning outcomes	117
Getting started – generating research questions	118
Where do research questions come from?	120
Finding the research question in published studies	124
Developing a research question	125
Research aims and objectives	128
Hypotheses	129
Feasibility	130
The link between the research question and method used	131
Chapter summary	131
Websites	132
References	133

10	Writing a Research Proposal	134
	Learning outcomes	134
	Preparing a dissertation or project proposal	135
	Preparing an application for funding	137
	Project management	144
	Chapter summary	147
	Suggested further reading	147
	Websites	148
	References	148
PART 3: DOING RESEARCH		149
11	Research Approaches and Design	151
	Learning outcomes	151
	Choosing a research design	152
	Research approaches	153
	Qualitative approaches	155
	Quantitative research	158
	Experimental research	159
	Quasi-experimental research	160
	Surveys	161
	Triangulation in research	161
	Chapter summary	162
	Suggested further reading	162
	Websites	163
	References	163
12	Sampling Techniques	165
	Learning outcomes	165
	Defining the population and sample	165
	Sampling frames	166
	Sample size calculation in quantitative research	167
	Sample size in qualitative research	167
	Probability sampling	168
	Non-probability sampling	171
	Chapter summary	174
	Suggested further reading	175
	Websites	175
	References	175
13	Rigour and Trustworthiness in Research	177
	Learning outcomes	177
	Rigour, validity and reliability in quantitative research	177
	Rigour and trustworthiness in qualitative research	181

Chapter summary	184
Suggested further reading	184
Websites	184
References	184
14 Experimental Designs	186
Learning outcomes	186
What is an experimental design?	186
Randomised controlled trials	189
Cross-over trials	190
Quasi-experiments	191
Stepped-wedge cluster-randomised trials	192
Ethical issues associated with experimental and quasi-experimental designs	194
Chapter summary	195
Suggested further reading	195
Websites	195
References	195
15 Qualitative Research Approaches	197
Learning outcomes	197
Qualitative approaches	198
Phenomenology	200
Ethnography	203
Grounded theory	205
Chapter summary	208
Suggested further reading	208
Websites	208
References	209
16 Evaluation and Outcomes-based Research	210
Learning outcomes	210
Evaluation: what is it and why do it?	211
Are all evaluations the same?	212
What approaches can be used?	213
What outcomes are used in evaluation research?	216
Steps for conducting an evaluation research project	216
Chapter summary	218
Suggested further reading	219
Websites	219
References	220
17 Consensus Methods	221
Learning outcomes	221
Delphi technique	222
Nominal group technique	223

Consensus techniques	225
Differences between the consensus methods	226
Chapter summary	227
Suggested further reading	227
Websites	228
References	228
18 Action Research	229
Learning outcomes	229
What is action research?	230
Definitions	232
Types of action research	233
Action research as a cyclical process	234
Participating in the research process	235
Stages of action research	237
Ethical issues in action research	242
Advantages and disadvantages of action research	242
Contexts for action research	243
Chapter summary	244
Suggested further reading	244
Websites	244
References	245
Appendix	246
19 Case Studies and Other Research Approaches	247
Learning outcomes	247
Case studies	248
Historical research	251
Feminist research	253
Chapter summary	254
Suggested further reading	254
Websites	255
References	255
20 Systematic Literature Reviews	256
Learning outcomes	256
Why are systematic reviews needed?	257
What is a systematic review?	258
What are the advantages and disadvantages of systematic reviews?	260
Stages in the systematic review process	261
Chapter summary	267
Suggested further reading	268
Websites	268
References	269
Appendix	270

21	Mixed Methods	275
	Learning outcomes	275
	Rationale for the use of mixed methods	275
	Applications of mixed methods	277
	Implications of using mixed methods	281
	Chapter summary	281
	Suggested further reading	281
	Websites	281
	References	282
22	Survey Design and Questionnaires	283
	Learning outcomes	283
	What is a survey?	284
	Survey designs	284
	What makes survey research different from other research methods?	286
	Assumptions of survey methods	288
	Data collection methods	288
	The role of sampling in surveys	289
	Ethical implications	290
	What is a questionnaire?	290
	Function of a questionnaire	291
	Designing and developing questionnaires	291
	Designing and developing measurement tools or rating scales	298
	Ways to improve response rates	299
	Advantages and disadvantages of surveys	301
	Epidemiological research	302
	Chapter summary	303
	Suggested further reading	305
	Websites	305
	References	305
23	Interviews	306
	Learning outcomes	306
	How do you conduct an interview?	306
	Qualitative interviews	309
	Quantitative interviews	312
	Focus group interviews	314
	Telephone interviews	315
	What are the power issues in interviews?	315
	What are the advantages and disadvantages of interviewing?	316
	Chapter summary	316
	Suggested further reading	317
	Websites	317
	References	317

24	Observations	319
	Learning outcomes	319
	What is observational research?	319
	Structured observations	320
	Unstructured observations	324
	Data recording	326
	Ethical issues	327
	What are the advantages and disadvantages of observational research?	327
	Chapter summary	327
	Suggested further reading	328
	Websites	329
	References	329
25	Other Methods of Data Collection	330
	Learning outcomes	330
	Triangulation in data collection	330
	Using tests, scales and measurements	331
	Using documents	335
	Life history and biographical material	336
	Critical incident technique	337
	Diaries	338
	Using archive material	340
	Internet and web-based techniques	341
	Chapter summary	343
	Suggested further reading	343
	Websites	343
	References	343
26	Quantitative Data Analysis Techniques	345
	Learning outcomes	345
	Statistical methods	346
	Types of data	347
	Descriptive statistics: Techniques for describing quantitative data	349
	Tables and charts	350
	Correlation	351
	Inferential statistics	353
	Statistical hypotheses	354
	Sampling variation	354
	Statistical hypothesis testing	355
	Choosing a statistical method for data analysis	358
	Using computer software for analysis	360
	Data preparation, input, verification and cleaning	360

Ethical considerations	362
Chapter summary	363
Suggested further reading	363
Websites	363
References	364
27 Qualitative Data Analysis Techniques	365
Learning outcomes	365
Analysis of qualitative data	366
Preparing the data	368
Using computer software for analysis	369
Content analysis	370
Narrative analysis	373
Interpreting the findings	374
Chapter summary	377
Suggested further reading	377
Websites	377
References	377
PART 4: SHARING RESEARCH	379
28 Presenting and Disseminating Research	381
Learning outcomes	381
Dissemination of research	382
Writing up research papers	384
Preparing conference presentations	387
Chapter summary	392
Suggested further reading	392
Websites	393
References	393
29 Using Research in Practice	394
Learning outcomes	394
Why should we use research in practice?	395
How do you 'do' evidence-based practice?	396
Origins and development of evidence-based practice	398
Critics of an evidence-based practice approach	399
Using research and evidence-based practice in practice	399
Chapter summary	402
Websites	402
References	402
<i>Glossary of Terms</i>	404
<i>Index</i>	416
