for students taking the USMLE

- New review series to speed you through your clinical years
- Concise text and clear illustrations help you to absorb information fast
- Online USMLE questions

Contents

Preface	v	7. Vomiting.	33
Part I: The Patient Presents With	1	History and differential diagnosis of vomiting	33
1. Indigestion	3	Examining the patient with vomiting problems	34
History of the patient with indigestion	3	Investigating vomiting problems	35
Examining the patient with indigestion	5	8. Hematemesis and Melena	37
Investigating indigestion	5	History of the patient with hematemesis	37
Gastric emptying studies	8	Examining the patient with hematemesis	38
2. Swallowing Problems	9	Investigating hematemesis	38
Differential diagnosis	9	9. Diarrhea	41
History of the patient with swallowing problems	9	History of the patient with diarrhea	41
Examining the patient with swallowing problems	11	Examining the patient with diarrhea	42
Investigating swallowing problems	11	Investigating diarrhea	42
3. Acute Abdominal Pain	15	10. Rectal Bleeding	47
History of the patient with acute abdominal pain	15	History of the patient with rectal bleeding	47
Examining the patient with acute abdominal pain	16	Examining the patient with rectal bleeding	47
Investigating acute abdominal pain	17	Investigating rectal bleeding	48
4. Chronic Abdominal Pain	21	11. Anemia	49
History of the patient with chronic abdominal pain	21	History of the patient with anemia	49
Examining the patient with chronic abdominal pain	22	Examining the patient with anemia	50
Investigating chronic abdominal pain	22	Investigating anemia	50
5. Abdominal Distention	25	12. Jaundice	53
History of the patient with abdominal distention	25	History of the patient with jaundice	53
Examining the patient with abdominal distention	26	Examining the patient with jaundice	54
Investigating abdominal distention	27	Investigating jaundice	55
6. Weight Loss and Anorexia	29	13. Abnormal Liver Biochemistry	57
History of the patient with weight loss	29	History of the patient with abnormal liver biochemistry	57
Examining the patient with weight loss	29	Examining the patient with abnormal liver biochemistry	58
Investigating weight loss	30	Investigating abnormal liver biochemistry	58

Part II: Diseases and Disorders 61

14. Esophagus 63
 Anatomy, physiology, and function
 of the esophagus 63
 Inflammatory conditions 63
 Neoplasia 67
 Anatomic and functional problems 70

15. Stomach 73
 Anatomy, physiology, and function
 of the stomach 73
 Acute gastritis 73
 Peptic ulcer disease 75
 Neoplasia of the stomach 79
 Complications following gastric surgery 83

16. Small Intestine 89
 Anatomy, physiology, and function
 of the small intestine 89
 Immune-related problems 90
 Neoplastic problems 95

17. Colon 103
 Anatomy and physiology of the colon
 and rectum 103
 Functional disorders 103
 Inflammatory bowel disease 105
 Neoplastic disorders 109
 Anorectal conditions 114
 Infections 117

18. Liver 121
 Structure and function of the liver 121
 Hyperbilirubinemias 121
 Viral hepatitis 123
 Other infections involving the liver 131
 Metabolic and genetic liver disease 132
 Chronic liver disease 136
 Cirrhosis 143
 Tumors of the liver 150
 Drugs and the liver 152
 Liver abscesses 155
 Parasitic infection of the liver 156
 Polycystic liver syndromes 158

19. Biliary Tract 161
 Anatomy, physiology, and function
 of the hepatobiliary system 161
 Gallstones 162
 Tumors of the biliary tract 165

Benign anatomic bile duct problems 166
 Infections of the biliary tract 167

20. Pancreas 171
 Anatomy, physiology, and function
 of the pancreas 171
 Acute pancreatitis 171
 Chronic pancreatitis 173
 Pseudocysts 174
 Cystic fibrosis 175
 Carcinoma of pancreas 176
 Endocrine tumors 178

Part III: History, Examination, and Common Investigations 181

21. Taking a History 183
 Preliminaries 183
 The standard structure of a history 183

22. Examination of the Patient 187
 Examination preliminaries 187
 Face 187
 Hands 188
 Neck, thorax, and upper limbs 188
 Lower limb 189
 Back 190
 Abdominal examination 190
 Rectal examination 193

23. Writing Up a Medical History 195
 Purpose 195
 Structure 195
 Illustration 195
 Formulating a differential diagnosis 195
 Investigation 196
 Continuity 196
 Sample medical history 196

24. Common Tests 199
 Routine hematology 199
 Biochemistry 201
 Endocrine and metabolic 201
 Liver enzymes and liver function tests 203
 Liver biopsy 206
 Tests of pancreatic and gastric function 206
 Breath tests 206
 Motility physiology 207
 Serologic tests 208
 Genetic markers 210
 Imaging 212

Index 219
