Preface xiii

Part 1

What is healthcare research? 1

- 1 The research journey 2
- 2 Types of review and their purpose 4
- 3 Using databases to search the literature 6
- 4 Undertaking a Cochrane systematic review 8
- 5 Undertaking a Joanna Briggs Institute systematic review 10
- 6 Using EndNote 12
- 7 Using the PICO framework 14
- 8 Using the SPICE framework 16
- 9 Using grey literature in the quest for evidence 17
- 10 Why does research need evaluating? 18
- 11 Key issues in evaluating research 20
- 12 Critically reviewing a research paper 22
- 13 The hierarchy of evidence 24
- 14 Factors influencing research design 26
- 15 Patient and public involvement in research 28
- 16 Descriptive studies 30
- 17 Action research 32
- 18 Participatory health research 34
- 19 The ethics of healthcare research 36
- 20 Preparing a research proposal 38
- 21 Developing a patient research information pack 40
- 22 Getting the most from supervision 42
- 23 Writing a research report 44
- 24 Implementation of healthcare research 46
- 25 Barriers to research utilisation 48
- 26 Designing service evaluations 50
- 27 Designing audit tools for measuring compliance 52

Part 2

Quantitative research 55

- 28 Quantitative and qualitative research approaches 56
- 29 Understanding the randomised controlled trial 58
- 30 Quasi-experimental study design 60
- 31 Case-control studies 62
- 32 Cross-sectional design 64
- 33 Survey research methods 66
- 34 Factorial survey using vignettes 68
- 35 Triangulation in research 70

Part 3

Qualitative research 73

- 36 Ethnography 74
- 37 Qualitative observational methods 76
- 38 Phenomenology 78
- 39 Grounded theory 80
- 40 Classical grounded theory 82
- 41 Case study research 84
- 42 Focus group research 86
- 43 The Delphi process 88
- 44 The nominal group technique 90
- 45 The icon metaphor technique 92
- 46 Interpretative phenomenological analysis 94
- 47 Theory building 96
- 48 Qualitative interviewing 98
- 49 Thematic analysis 100
- 50 Social network analysis 102
- 51 Critical discourse analysis 104
- 52 Bricolage research methods 106
- 53 Narrative inquiry 108
- 54 Appreciative inquiry 110
- 55 Qualitative data analysis software packages 112

Part 4

Research techniques 115

- 56 Questionnaire design 116
- 57 Using web-based tools to design a questionnaire 118
- 58 Quality of life scales 120
- 59 The State-Trait Anxiety Inventory 122
- 60 Kelly's repertory grids 124
- 61 Critical incident technique 126

Part 5

Conducting research with special groups 129

- 62 Conducting research with vulnerable groups 130
- 63 Research methods applicable to vulnerable groups 132
- 64 Draw and write/tell technique 134
- 65 Engaging children and young people in research 136
- 66 Photographic elicitation as a means of collecting data 138
- 67 Focus groups with children and young people 140
- 68 Critical ethnography with children 142
- 69 Using pre-test post-test designs with children 144
- 70 Conducting research with older adults 146
- 71 Conducting surveys with people with learning disabilities 148
- 72 Conducting focus groups with people with learning disabilities 150
- 73 People with learning disabilities as co-researchers 152
- 74 Undertaking research with family carers 154
- 75 Obtaining consent from vulnerable groups 156
- 76 Living lab approach 158

Part 6

Historical research 161

- 77 What is historiography? 162
- 78 Source criticism 164
- 79 Critiquing historical research 166
- 80 Oral tradition 168

Part 7

Educational research 171

- 81 Secondary data analysis: analysing documents 172
- 82 Traditional annotation and coding 174
- 83 Video-View-Point 176
- 84 Ethnography and healthcare education 178
- 85 Semantic annotation of skills-based sessions 180
- 86 Actor network theory 182

Part 8

Appendices 185

- 1 Sampling 186
- 2 Calculating the required sample size 188
- 3 Estimating population means 188
- 4 Research data management 189
- 5 Types of data 190
- 6 Data requirement planning 190
- 7 Descriptive statistics 191
- 8 Frequency distribution 191
- 9 Hypothesis testing and statistical significance 192
- 10 Choosing the right test 192
- 11 Non-parametric tests 193
- 12 Student's *t*-test 193
- 13 Analysis of variance 194
- 14 Tabulating data and the chi-squared test 195
- 15 Correlation 196
- 16 Measuring and interpreting correlation 197
- 17 Simple linear regression 199
- 18 Meta-analysis 200
- 19 Propensity score matching 201
- 20 Mokken scaling 203
