PREFACE ix

A FOUNDATION FOR ANATOMY AND PHYSIOLOGY 2

- **Learning the Language of Anatomy and Physiology 2**
- **The Scientific Method 4**
 - Forming a Hypothesis 4
 - Avoiding Bias 6
 - The Need for Repeatability 8

AN INTRODUCTION TO DIAGNOSTICS 9

- **Homeostasis and Normal Values 9**
 - Homeostatic Failure 9
 - Homeostasis and Disease 10
 - Symptoms and Signs 11
- **Steps in Diagnosis 11**
 - The Purpose of Diagnosis 13

APPLIED RESEARCH TOPICS 18

- **The Application of Principles in Chemistry 18**
 - The Medical Importance of Radioisotopes 18
 - Radioisotopes and Clinical Testing 18
 - Radiopharmaceuticals 20
 - Solutions and Concentrations 20
- **Topics in Metabolism 21**
 - Artificial Sweeteners 21
 - Fat Substitutes 22
 - Anomalies in Amino Acid Metabolism 22
- **Topics in Cellular Biology and Histology 23**
 - The Nature of Pathogens 23
 - Bacteria 23
 - Viruses 24
 - Prion Diseases 27
 - Unicellular Pathogens and Multicellular Parasites 28
 - Cell Structure and Function 28
 - Lysosomal Storage Diseases 28
 - Mitochondrial DNA, Disease, and Evolution 28
 - Tissue Structure and Disease 29

• Topics in Molecular Biology 30

- Genetic Engineering and Gene Therapy 30
 - Mapping the Human Genome 30
 - Gene Manipulation and Modification 30
 - Genetic Engineering—Questions to Think About 33
- Cancer 33
 - Cancer Causes 33
 - Cancer Formation and Growth 34
 - Detection and Incidence of Cancer 35
 - Clinical Staging and Tumor Grading 36
 - Cancer Treatment 36
 - Cancer and Survival 37

THE BODY SYSTEMS: CLINICAL AND APPLIED TOPICS 38

- **The Integumentary System 38**
 - Examination of the Skin 38
 - Diagnosing Skin Conditions 40
 - Disorders of Keratin Production 40
 - Transdermal Medications 42
 - Abnormal Skin Pigmentation 43
 - Skin Cancers 43
 - Tumors in the Dermis 44
 - Dermatitis 44
 - Disorders of the Accessory Organs of the Skin 44
 - Baldness and Hirsutism 44
 - Acne 45
 - Injuries and Treatment of Skin Conditions 45
 - A Classification of Wounds 45
 - Burns and Grafts 46
 - Synthetic Skin 47
- Critical-Thinking Questions 47
- **The Skeletal System 50**
 - The Symptoms of Bone and Joint Disorders 51

- Examination of the Skeletal System 51
 - Abnormalities in Skeletal Development 51
 - Hyperostosis and Acromegaly 53
 - Stimulation of Bone Growth and Repair 54
 - Osteoporosis and Age-Related Skeletal Abnormalities 54
 - Individual Variation in the Skeletal System 54
 - Septal Defects and Sinus Problems 56
 - TMJ Syndrome 56
 - Kyphosis, Lordosis, and Scoliosis 56
 - Problems with Intervertebral Discs 56
 - Spina Bifida 58
 - Problems with the Ankle and Foot 58
 - Rheumatism, Arthritis, and Synovial Function 59
 - Hip Fractures, Aging, and Professional Athletes 59
- Critical-Thinking Questions 60
- **The Muscular System 62**
 - Signs and Symptoms of Muscular System Disorders 62
 - Necrotizing Fasciitis 62
 - Trichinosis 64
 - Fibromyalgia and Chronic Fatigue Syndrome 64
 - The Muscular Dystrophies 65
 - Botulism 65
 - Myasthenia Gravis 66
 - Polio 66
 - Hernias 67
 - Sports Injuries 67
 - Carpal Tunnel Syndrome 68
 - Critical-Thinking Questions 68
- **The Nervous System 70**
 - The Symptoms of Neurological Disorders 70
 - The Neurological Examination 71
 - Headaches 71
 - Demyelination Disorders 72
 - Drugs and Synaptic Function 73
 - Spinal Anesthesia 73
 - Epidural and Subdural Hemorrhages 73
 - Meningitis 74
 - Spinal Cord Injuries and Experimental Treatments 75
 - Hydrocephalus 76
 - Lumbar Puncture and Myelography 76
 - Amnesia 77
 - Seizures and Epilepsy 77
 - The Basal Nuclei and Parkinson's Disease 78
 - Huntington's Disease 79
 - Cerebellar Dysfunction 79
 - Shingles and Hansen's Disease 79
 - Palsies 80
 - Reflexes and Diagnostic Testing 80
 - Abnormal Reflex Activity 80
 - Multiple Sclerosis 81
 - Alzheimer's Disease 82
- Problems with Sensory Systems 82
 - The Control of Pain 82
 - Assessment of Tactile Sensitivities 83
 - Conjunctivitis 84
 - Corneal Transplants 84
 - Glaucoma 84
 - Otitis Media and Mastoiditis 84
 - Vertigo 85
 - Testing and Treating Hearing Deficits 85
- Critical-Thinking Questions 86
- **The Endocrine System 87**
 - The Symptoms of Endocrine Disorders 88
 - The Diagnosis of Endocrine Disorders 88
 - Thyroid Gland Disorders 90
 - Disorders of Parathyroid Function 90
 - Disorders of the Adrenal Cortex 90
 - Disorders of the Adrenal Medullae 91
 - Light and Behavior 91
 - Diabetes Mellitus 92
 - Endocrinology and Athletic Performance 93
 - Androgen Abuse 93
 - EPO Abuse 93
 - GHB and Clenbuterol 94
 - Critical-Thinking Questions 94
- **The Cardiovascular System 96**
 - The Physical Examination and the Cardiovascular System 96
 - Cardiovascular Disorders and Diagnostic Procedures 98
 - Polycythemia 99
 - Thalassemia 99
 - Sickle Cell Anemia 99

- Bilirubin Tests and Jaundice 100
- Iron Deficiencies and Excesses 100
- Erythrocytosis and Blood Doping 101
- Blood Tests and RBCs 101
- Hemolytic Disease of the Newborn 102
- The Leukemias 102
- Testing the Clotting System 104
- Infection and Inflammation of the Heart 104
- The Cardiomyopathies 104
- Heart Transplants and Assist Devices 105
- RHD and Valvular Stenosis 105
- Coronary Artery Disease 106
- Heart Attacks 107
- Diagnosing Abnormal Heartbeats 108
- Tachycardia and Fibrillation 108
- Aneurysms 109
- Arteriosclerosis 110
- Problems with Venous Valve Function 111
- Hypertension and Hypotension 112
- Shock 113
- Other Types of Shock 113
- Heart Failure 115
- Treatment of Cerebrovascular Disease 116
- Congenital Circulatory Problems 117
- Critical-Thinking Questions 118
- **The Lymphatic System and Immunity 120**
 - The Physical Examination and the Lymphatic System 120
 - Disorders of the Lymphatic System 121
 - Lymphedema 121
 - Infected Lymphoid Nodules 121
 - Lymphomas 122
 - Disorders of the Spleen 123
 - Immunization 123
 - Transplants and Graft Rejection 124
 - AIDS 125
 - Lyme Disease 128
 - Immune Competence 129
 - Immediate Hypersensitivity 130
 - Immune Complex Disorders 130
 - Delayed Hypersensitivity 131
 - Technology, Immunity, and Disease 131
 - Critical-Thinking Questions 132
- **The Respiratory System 134**
 - Symptoms of Respiratory Disorders 134
 - The Physical Examination and the Respiratory System 134
 - Disorders of the Respiratory System 135
 - Cystic Fibrosis 136
 - Asthma 137
 - Respiratory Distress Syndrome (RDS) 137
 - Tuberculosis 137
 - Decompression Sickness 138
 - Emphysema 138
 - Critical-Thinking Questions 139
- **The Digestive System 140**
 - Symptoms and Signs of Digestive System Disorders 140
 - The Physical Examination and the Digestive System 140
 - Disorders of the Digestive System 141
 - Dental Problems and Dental Implants 143
 - Peptic Ulcers 143
 - Drastic Weight-Loss Techniques 143
 - Liver Disease 144
 - Hepatitis 144
 - Cirrhosis 144
 - Problems with Bile Storage and Excretion 145
 - Colon Inspection and Cancer 145
 - Inflammatory Bowel Disease 146
 - Diarrhea 146
 - Lactose Intolerance 147
 - Phenylketonuria 147
 - Protein Deficiency Diseases 148
 - Gout 148
 - Eating Disorders 148
 - Obesity 149
 - Alcohol: A Risky Diversion 150
 - Perspectives on Dieting 151
 - Heat Exhaustion and Heat Stroke 152
 - Hypothermia 153
 - Accidental Hypothermia 153
 - Thermoregulatory Problems of Infants 153
 - Critical-Thinking Questions 154
- **The Urinary System 156**
 - The Physical Examination and the Urinary System 156
 - Conditions Affecting Filtration 158

- Glomerulonephritis 158
- Diuretics 158
- Urinalysis 159
- Advances in the Treatment of Kidney Failure 160
- Problems with the Conducting System 162
- Urinary Tract Infections 162

Critical-Thinking Questions 162

• **The Reproductive System and Development 164**

- The Physical Examination and the Reproductive System 164
 - Assessment of the Male Reproductive System 164
 - Assessment of the Female Reproductive System 165
 - Normal and Abnormal Signs Associated with Pregnancy 165
- Disorders of the Reproductive System 166
 - Prostatitis, Prostatic Hypertrophy, and Prostate Cancer 166
 - Ovarian Cancer 167
 - Uterine Tumors and Cancers 168
 - Endometriosis 168

- Vaginitis 168
- Breast Cancer 169
- Sexually Transmitted Diseases 170
- Experimental Contraceptive Methods 171
- Technology and the Treatment of Infertility 171

- Disorders of Development 173
 - Ectopic Pregnancies 173
 - Problems with Placentation 174
 - Problems with the Maintenance of a Pregnancy 174
 - Common Problems with Labor and Delivery 175
 - Monitoring Postnatal Development 175
 - Death and Dying 176

Critical-Thinking Questions 178

ANSWERS TO CRITICAL-THINKING QUESTIONS 183
