สารบัญ

Part 1: General Care

1	Basic principles of critical care	2
2	Pain & sedation	9
3	Vasopressors & inotropes	15
4	Intravenous fluid	18
5	Blood product administration	21

Part 2: Acute Conditions

6	Cerebrovascular diseases	26
7	Status epilepticus	29
8	Sepsis & septic shock	32
9	Acute coronary syndrome	37
10	Hypertensive emergency	41
11	Cardiac tamponade	44
12	Cardiac arrest	48
13	Tension pneumothorax	56
14	Massive pulmonary embolism	59
15	Acute respiratory distress syndrome	63
16	Asthma & COPD exacerbation	65
17	Massive gastrointestinal bleeding	71
18	Acute pancreatitis	76
19	Paracetamol overdose	80
20	Dysnatremia	85
21	Dyskalemia	89

22	Metabolic acidosis	94
23	Acute kidney injury	98
24	Snake bite	102
25	Dengue shock syndrome	106
26	Anaphylaxis	110
27	Severe cutaneous drug eruption	114
28	Hyperglycemic emergency	117
29	Hypoglycemia	123
30	Thyroid storm	128
31	Gut obstruction	137
32	Acute abdomen	141

Part 3: Procedures & Medications

33	Focus assessment with sonography in trauma (FAST)	146
34	Endotracheal intubation	150
35	Oxygen therapy	155
36	Central venous catheter placement	158
37	Needle thoracentesis	165
38	Intercostal drainage placement	168
39	Pericardiocentesis	172
40	Initial ventilator setting	178
41	Non-invasive ventilation	182
42	Cricothyroidotomy	187

Part 4: Normal Laboratory Values

Hematology	192
Gastrointestinal	193
Pulmonary and critical care	193
Infection	194
Cardiovascular	194
Renal and electrolyte	194
Endocrine	195
Therapeutic drugs	195
Others	196

Index	197
