Journal of Midwifery & Women's Health

The Official Journal of the American College of Nurse-Midwives

Editorial

- 7 Listening to Midwives
Patricia Aikins Murphy

Commentary

- 9 Reframing US Maternity Care: Lessons Learned From End-of-Life Care
Ellen L. Tilden, Jonathan M. Snowden, Aaron B. Caughey, Nancy K. Lowe

Original Research and Reviews

- 12 Acupuncture and Acupressure in Labor

CEU

Acupuncture and acupressure for women in labor hold promise to be effective treatments though more evidenced-based research is needed.
Judith M. Schlaeger, Elizabeth M. Gabzdyl, Jeanie L. Bussell, Nobuari Takakura, Hiroyoshi Yajima, Miho Takayama, Diana J. Wilkie

- 29 Labor Intervention and Outcomes in Women Who Are Nulliparous and Obese: Comparison of Nurse-Midwife to Obstetrician Intrapartum Care

Among nulliparous, obese women in spontaneous labor, watchful waiting and hydrotherapy provided outcomes that are similar to or better than interventions such as oxytocin augmentation.
Nicole S. Carlson, Elizabeth J. Corwin, Nancy K. Lowe

- 40 Cesarean Outcomes in US Birth Centers and Collaborating Hospitals: A Cohort Comparison

Women receiving prenatal care in birth centers have a small decreased risk of cesarean if admitted in labor to birth centers rather than hospitals.
Patrick Thornton, Barbara L. McFarlin, Chang Park, Kristin Rankin, Mavis Schorn, Lorna Finnegan, Susan Stapleton

- 49 Unwarranted Variation in Utilization of Cesarean Birth Among Low-Risk Childbearing Women

Low-risk childbearing women are vulnerable to unwarranted variations within the health care delivery system that cause overutilization of cesarean birth.
Diana R. Jolles

- 58 US Physician and Midwife Adherence to Active Management of the Third Stage of Labor International Recommendations

Both inter- and intraprovider variation is present in the use of cord traction and oxytocin administration during management of the third stage of labor in the United States.
Mavis N. Schorn, Mary S. Dietrich, Beth Donaghey, Ann F. Minnick

- 68 Effects of Human Maternal Placentophagy on Maternal Postpartum Iron Status: A Randomized, Double-Blind, Placebo-Controlled Pilot Study

Encapsulated placenta neither significantly improves nor impairs postpartum maternal iron status for women consuming adequate amounts of dietary iron, compared to a beef placebo.
Laura K. Gryder, Sharon M. Young, David Zava, Wendy Norris, Chad L. Cross, Daniel C. Benyshek

- 80 A Mixed-Methods Study of Vicarious Posttraumatic Growth In Certified Nurse-Midwives

Nurse-midwives who have attended traumatic births report a small degree of vicarious posttraumatic growth due to their struggles with these challenging life events.
Cheryl Tatano Beck, Jamie Rivera, Robert K. Gable

88 Where Do You Feel Safest? Demographic Factors and Place of Birth

Black women have fewer out-of-hospital births than white women, yet 12% of both black and white women say they feel safest giving birth out of hospital.
Mickey Sperlich, Cynthia Gabriel, Julia Seng

93 Modification of Obstetric Emergency Simulation Scenarios for Realism in a Home-Birth Setting

Hospital-based obstetric simulations can be successfully modified for home-birth midwives while retaining fidelity and resulting in a high level of participant satisfaction and self-confidence in learning.
Janelle Komorowski, Tia Andrighetti, Melissa Benton

Brief Report

101 The American College of Nurse-Midwives Clarity in Collaboration Project: Describing Midwifery Care in Interprofessional Collaborative Care Models

The ACNM Clarity in Collaboration project used a consensus-building approach to develop definitions of concepts related to midwifery care in the context of interprofessional collaboration.
Maria Freytsis, Julia C. Phillippi, Kim J. Cox, Amy Romano, Leslie Cragin

Evidence-Based Practice

109 Current Resources for Evidence-Based Practice January/February 2017
